

### Overview

GoITX is an Information Technology (IT) company that extends (X) the effectiveness of the IT department in order to drive dramatic improvements in your business performance. GoITX has been providing technology services to companies implementing mission critical applications and system topologies for over 12 years. Armed with depth of experience in a variety of industries and leading edge technologies, the goITX team is able to help companies derive the maximum value out of their IT investment.

### Application Hosting

GoITX provides industry leading hosted and premise based IT services that will help you to stabilize and maximize your IT investment by applying professional, yet affordable, IT infrastructure services without having to constantly reinvest and retrain internal staff members. GoITX can either augment your current staff or serve as a complete IT and information management organization.

With Information Technology continuing to change and evolve at an accelerated pace, companies find themselves pressured to make ongoing internal training and staff development investments in order to remain competitive. As an outsourced IT service provider, goITX stays ahead of the technology curve to ensure companies such as your benefit from our industry knowledge and expertise.

### goITX Hosting Benefits

- Upgrades to latest networking, utility, security and communications software.
- Maintenance and support of high performing file, application, exchange, and database servers.
- Lightning fast T-1 based Internet access, email, e-commerce, and application process

## Improved Business Performance

GoITX provides leading edge technology and business application performance improvement services. The primary goal is to help companies improve the effectiveness of their IT infrastructure and more importantly improve the performance of the Information Worker staff members. In today's faced paced global economy, it is not enough to simply install a packaged business application and hope that it will deliver benefit to the organization. Most companies seek to deploy one or more mission critical business application solutions combined with Microsoft productivity tools and internet and networked based collaboration solutions. In addition, the technology industry is changing at an ever increasing rate and as new technology advances emerge, their inclusion into the IT topology can impede performance if they are not integrated correctly.

GoITX specializes integrating and configuring mission critical IT infrastructures in order to ensure they deliver the performance and value you hoped they would, allowing you to focus on your business rather than your computer systems. The goITX staff can be utilized to augment and extend your existing IT staff or serve as the primary IT resources, depending upon each customer's needs.
